

Why Choose DataVantage Global® For Your Data Protection Requirements?

● **Do you want a single, enterprise-wide data protection software solution that can access 200+ data systems and the most popular platforms or do you want costly, multiple, non-interoperable solutions that require the kinds of extensive customization that might be needed in the event of corporate reorganizations, acquisitions or divestitures?**

Only DataVantage Global is a single, enterprise-wide information sharing software system with data protection features capable of simultaneously accessing a variety of disparate data systems on different platforms while obfuscating both production and non-production information concurrently hosted on mainframe and distributed data systems by using combinations of different techniques. Choosing DataVantage Global will not result in additional expenses following corporate business developments.

● **Do you want to pay MIPS/CPU-based upgrade fees for your mainframe databases?**

DataVantage Global's license fees are based on concurrent use so you will never pay huge hardware upgrade fees.

● **Do you want to manage concurrently the many different tasks of obfuscating information over disparate multiple platforms and data systems or would you rather manage each operation one at a time?**

DataVantage Global also features support for multi-level security (MLS) through its obfuscation technology to allow sharing of information on a need-to-know basis by using its multi-threaded architecture that processes tasks as well components of each task simultaneously while providing significant gains in efficiency over traditional mass-duplication techniques.

● **Do your top executives need to know if stolen information has been obfuscated?**

In the unfortunate event that your sensitive customer or corporate information is stolen, DataVantage Global's technology for forensic traceability will mitigate these risks with even stronger capabilities to come.

● **Do you want your audit reports and configuration files locked down?**

DataVantage Global offers technology that secures audit reports and system configurations to protect sensitive information. You will always know who has access to prepare and alter information.

● **Do you want your software provider to offer affordable, new solutions to current and future risks related to data protection?**

DCR is dedicated to cost effective innovations, but we are equally driven to provide you with knowledge updates from DCR Research Board's latest work in Risk Management, Threat Knowledge Modeling, Resiliency and Business Continuity. DCR also chairs the INCITS Study Group on Security Best Practices which collaborates with financial industry leaders and consortia such as FSTC and BITS, among others.

THE QUESTIONS ARE TOUGH, BUT THE ANSWER IS EASY: DATAVANTAGE GLOBAL
